PROFILE

Backend developer with hands-on experience building production-grade REST APIs using Node.js, Express.js, TypeScript, and PostgreSQL with Prisma ORM. Built Beggy – a full-stack monorepo application featuring JWT + OAuth authentication, RBAC with CASL, CSRF protection, rate limiting, structured logging with Pino, and comprehensive unit and integration testing with Vitest and Supertest. Comfortable working across the full stack when needed, with solid experience in React and RTK Query. Passionate about clean architecture, type safety, and security best practices.

TECHNICAL SKILLS

Frontend – React, Next.js, Redux Toolkit, RTK Query, Tailwind CSS, shadcn/ui, Bootstrap, Angular (basics)

Backend – Node.js, Express.js, Django, REST API, Zod, Pino, Swagger/OpenAPI

Languages – Python, JavaScript (ES6+), TypeScript

API Development – RESTful APIs, GraphQL (queries, mutations, subscriptions)

Databases – PostgreSQL, MongoDB, MySQL, Prisma ORM, Django ORM, Mongoose ODM

Auth & Security – JWT, OAuth 2.0 (Google/Facebook), Passport.js, CASL/RBAC, CSRF, bcrypt, Helmet, rate limiting

Testing – Vitest, Supertest, Pytest, React Testing Library, Playwright, unit/integration/E2E

DevOps & Tooling – Docker, Docker Compose, Turborepo, pnpm, Git, GitHub, SWC, CI/CD basics

SOFT SKILLS

– Problem-Solving | Attention to Detail | Ownership Mindset | Collaboration | Adaptability

LANGUAGES

Arabic – Native/Bilingual

English – B1

PROJECTS

Beggy 📁

Intelligent Travel Packing Assistant

- Architected a full-stack monorepo (Turborepo, pnpm workspaces) with a shared TypeScript package for Zod schemas and types; built a secure **Express.js v5 REST API** with modular service→controller→route architecture, structured logging via **Pino**, and **Swagger/OpenAPI** documentation.
- Implemented full authentication and security layer: **JWT** access/refresh token rotation, **Google and Facebook OAuth** via Passport.js, **CSRF double-submit cookie** protection, **bcrypt** password hashing, rate limiting, and XSS sanitization.
- Designed **RBAC** with **CASL** and custom Permission/Role models in PostgreSQL; modeled a polymorphic container system via **Prisma ORM** supporting pack/unpack/move operations; wrote comprehensive **unit and integration tests** with **Vitest** and **Supertest** against a dedicated test database.
- Containerized the stack with **Docker Compose** (separate dev/prod configs with multi-stage builds); built the frontend with **Next.js 16**, **React 19**, **RTK Query**, **shadcn/ui**, and **Tailwind CSS v4** with CASL-powered conditional rendering.

EDUCATION

Bachelor of Commerce

Cairo University

Major: Accounting | Specialization: Auditing and Corporate Governance
